Managing Director,
KSMSCL, Bangalore.

Software Developer:

Job Purpose:

To design, develop, test, and maintain E-Upakarna software using Java technologies, ensuring quality, scalability, and alignment with client requirements. The role includes managing Change Requests (CRs), coordinating with CDAC, KSMSCL and Institutions, and ensuring seamless operationalization of software at client sites.

Educational Qualification:

- Bachelor of Engineering in (Computer Science /Information Science)/Master of Computer Application.

Experience:

- Minimum 5 years of total experience.
- Must have 60% marks for the qualifying exam.

Technical Skills Required:

- Programming: **Java, JavaScript**
 - Frameworks: **Struts, Spring**
 - Web Services: **REST, SOAP**
 - Database: **PostgreSQL**
 - Tools: **Redmine, Bugzilla, SVN**
-

Job Description:

Requirement Gathering & Analysis:

- Analyze functional and technical requirements received through CRs.
- Interact with clients to collect periodic software requirements.
- Update and track progress using Redmine.

Design & Development:

- Conduct impact and domain analysis; provide delivery timelines.
- Design software modules, database queries, and procedures.
- Develop applications using **Java, JavaScript**, and frameworks like **Struts** and **Spring**.
- Implement REST/SOAP **Web Services** for integration with other systems.
- Use **PostgreSQL** for backend development and database design.
- Reuse or create reusable software components where applicable.
- Manage code versioning using **SVN** (check-in/check-out).

Testing & Quality Assurance:

- Perform **unit testing, code reviews, and peer reviews.**
- Analyse and prevent defect patterns through corrective and preventive actions.

Documentation:

- Prepare and maintain technical documents such as:
 - Design Documents
 - Code Review Reports
 - Release Notes & Deployment Sheets
- Update and share user manuals (written/video formats) with end-users.

Issue Tracking & Release Management:

- Log and maintain bugs/CRs/PRs using **Redmine** and **Bugzilla.**
- Ensure data readiness for deployment and proper closure of issues.

Client Interaction & Support:

- Assist in mapping requirements to workflows, users, and data structures.
- Provide software demonstrations and ensure closure of issues post-verification.
- Participate in client meetings and video conferences.
- Coordinate closely with internal teams, CDAC, and the Data Centre.

Managing Director,
KSMSCL, Bangalore

State Project Coordinator:

Job Purpose:

To lead and coordinate the **state-wide implementation** of the Equipment Maintenance & Management Software across government health institutions. This role focuses on **strategic planning, capacity building, stakeholder engagement, monitoring**, and ensuring successful adoption of the software, in alignment with the objectives of the Health Department.

Educational Qualification:

- BME (Biomedical Engineering) / MDS (Master of Dental Surgery) / MPH (Master of Public Health)

Experience:

- Min. **5 years of total experience**, out of which at least 2 years' experience in Government **sector is preferable**.
- Must have 60% marks for the qualifying exam.

Skills Required:

- Excellent **communication and interpersonal skills** to manage interactions with government officials, KSMSCL, and CDAC.
- Ability to work across **diverse state and district-level environments**.
- Strong **project management** and **multi-stakeholder coordination** abilities.
- Proficiency in **MS Office**, project tracking tools (e.g., Excel or PM software), and **data analysis**.
- Problem-solving skills and a proactive approach to handle operational challenges.

Job Description:

- Act as the **central point of contact** among Health Institutions, **KSMSCL, CDAC** etc
- **Coordinate** with district-level officers, health institution heads, and technical support teams to ensure smooth communication and execution.
- **Organize and conduct training sessions** for government staff and field-level users to ensure effective use of the software.
- Lead **day-to-day coordination** among various healthcare departments and stakeholders involved in implementation.
- Develop and maintain a **comprehensive implementation roadmap**, ensuring phased rollout across all identified government health facilities.
- Facilitate **timely onboarding** of all health institutions onto the software platform.
- Monitor software usage, identify challenges, and provide ongoing **operational support** to end users.

- Track implementation progress at all administrative levels.
 - Prepare and submit **regular progress reports**, highlighting key milestones, risks, and bottlenecks to senior authorities for timely interventions.
-
