**CIRCULAR.**

Karnataka State Medical Supplies Corporation Limited has developed the Tender Evaluation Management Software (TEMS) to effectively capture and manage tender-related information. The system records details such as tender publication, number of drugs/equipment called in the tender, bidder participation, number of calls, technical qualification status, financial details, and also facilitates generation of TEC/TAC agendas and proceedings. This initiative ensures greater transparency, improves efficiency, and streamlines the overall tender management process.

KSMSCL procures drugs and equipment for Government Hospitals through the tender process. The tenders are floated through the Karnataka Public Procurement Portal (KPPP) portal, and each stage of the tender process is updated in the portal.

In order to bring transparency in tender process and to ensure that the reasons why bidder got selected/Rejected by the Tender Scrutiny Committee or Tender Accepting Committee, KSMSCL has introduced a new initiative wherein all the evaluation reports will be uploaded against the respective Tenders in the TEMS Software.

Bidders will be able to view the reasons for rejection of their bids and will be given a time frame for appealing against their rejection if required. Bidders will be provided an option to submit appeals within a stipulated time (**Within 3(three) days** of uploading Technical Evaluation Committee /Tender Scrutiny Committee proceedings) by KSMSCL.

This initiative will benefit bidders by ensuring transparency and timely grievance redressal in furtherance of Section 13 of KTPP Act 1999 and Rule 26 (2-B) of KTPP rules 2000.
